My childhood all over again. Works with Xbox360 pad.

If you get a blackscreen when pressing esc just launch the pandy.exe next time (not the pandy3.exe). This is not at all what I was expecting. I thought it would be more like Desert Strike on the SNES/VPS. Controls and gameplay were not very enjoyable. Graphics settings also didn't stick so it was playing at an extremely low resolution.

It's a rail based shooter that you control the speed at which you advance, but don't the ability to stop and shoot, or aim very well at a particular target. Not to be snide, but arcade games 15 years ago played a lot better, and looked better.. As unlockable I would recommend it, cannot recommend someone to pay for this, it is outrageous. Instead of nothing when you find all secrets and 100% the game, you could get skins not pay for them.. Bored, Need a quackie?....This game will do it...Game wise that is....a quick n ez 8bit Contra-ish side shooter. Will keep you entertained for 7 Levels.. Like an exploding rubics cube, but extremely relaxing. Will satisfy the completionist and the casual in you. You've got to beat one more cube before going to bed. Then the sun comes up. Worth it. I'm enjoying this game so far. Some of the lines the main character says are a bit contrived. The hidden object puzzles are somewhat challenging. The scenes are lovely.. A great concept that delivers exactly what is described on the box. From what I've played so far, its an easy game to pick up, but difficult to truly get the most out of your boost/jump ability.

And only \$9 to boot; well worth the price.. One of the most interesting takes on a WW2 shooter. The combat is more of a puzzle than run and gun. Use your Assault, Base of Fire, and Bazooka squads to out maneuver an aggressive and clever enemy. For best results download Rendroc's Mod and Jmoney's sound mod for better AI, more commands, and authentic sound.. Lethe is hard to describe, imagine a blend of Bioshock Infinite without the gun play, Half Life 2's physics and top it all off with Amnesia. The graphics are really nice, the environment and story all feel seamless and unique. If you're looking for something interesting that isn't some triple A title, pick this up and you'll enjoy it.. I can see this game being fun with others online. Unfortunately, no one is really on.

Only played this game to get my trading cards and uninstalled it.

Review is currently based on my first time playing, single player in desktop mode.

Simplistic dungeon runner game.

Either try to run like hell or fight your way through.

Does not appear to be a ton of depth behind it, but I only made it to level 4 and completed two runs.

Currently only four weapons to choose from, would love to see upgrades and new weapon types!

Character leveling is linear and I'm not exactly sure what you get for leveling up.

Cant say I would buy it again at the current price.

Like a lot of these games, the potential is there... just keep going with it!

I am excited to try the boss battles in VR though!

Will update my review afterwards.. I initially rated this terribly, then I flipped, and now I've flopped. It's full of potential, but none of it is tapped.

After I took a sound from 1,001 Sony Sound Effects and rendered it as an ogg in the programs custom sound folder with SpectraLayers, I found the ASMR program loaded the file once I ran the program again. However, my college teacher used Vegas Pro for his audio editing for his radio show for years, and those same 1,001 Sony Sound Effects load into Vegas Pro without conversion, so... my flip just flopped. This software... is full of potential, but without proper and convenient export and import options, it just isn't as good as a cheap sound effects pack from Sony and a multitrack audio editor of choice, which may simply be the free Audacity.. This is a fun puzzle game. Gotta say, one of the highlights of this game is the amazing music! Downside is, the game is pretty short, and not terribly difficult (I finished it in 100 minutes). The final boss battle was super cool, wish there was more.. Hey guys,

So i'll try keep this concise and to the point. The tower is an early access game that blends story, adventure and horror all into one. Keeping in mind that it is of course an early access game i will point out that it lacks alot of playability and if you want a game that you can play until morning dawns then this is definately not for you. Im suprised they can release this when it has max 1 hour of game play and thats if u crawl everywhere. Overall i like where the game is going and i think it will really cature alot of horror and adventure seekers but atm i would recommend that you watch a video of someone playing it and save yourself \$7. I give it a thumbs up only because i like the concept; On everything else its a thumbs down.. Walking simulator but youre flying.

Theres not much to say except that it has good music and a nice artstyle.

However im not a huge fan of the flying itself because of the limited camera and not so great hitboxes.

Also i had the game go down to 30 fps on my 1080ti quite often.

Apart from that its a nice relaxing game for 2-3 hours. A good worms game but the multiplayer is not existent anymore.. I found Treasure Adventure World enjoyable. For the \$9.99 asking price, there's quite a bit of content. I got about 32 hours out of my playthrough before reaching end game. There's a new game + mode as well.

If one is a fan of metroidvanias, one will likely enjoy the play through. Decent enough story, ability gating keeps the gameplay fresh, and while it's not too difficult... it's not exactly a breeze either.

My one complaint is the floaty controls. I found myself fighting the controls often, with surfaces slippery and delayed input responses with things like changing direction making for some very frustrating experiences. This made contacting very small enemy or puzzle hitboxes very frustrating.

I am certain the control design is intentional to include an added layer of difficulty to the game. Otherwise, the game would be too easy if one didn't have to put much effort into planning approaches to puzzles/platforming/boss fights. One really needs to think before jumping in Treasure Adventure World. Many of the puzzles require pixel perfect timing.

Overall, I'd recommend this game for anyone that enjoys the metroidvania puzzle platformer genre.. I was really hoping this game would work.. this game is beautiful. the artwork is great. huge amounts of potential. but unfortunately really awful gameplay.

people say its like the tiny bang story... its not. the tiny bang story was fun.
this is a mismatch of poorly thought out puzzles.

as soon as you enter you see heaps of items yu know you must collect... but cant. because you have started the specific puzzles yet. that is fine. then you will notice cog icons which should let you start the puzzles. but not all of them are active and the game wont tell you when they become active. so after every puzzle you need to go back and click on them all again. there is very little correlation between the puzzles though.

the most frustrating thing is you when you finally throw your hands up and get a hint. it twells you to grab the thing you have been clicking on for the last 10 mins. stupid game
